

C Interview Questions

1. What is C language?
2. Who developed C?
3. What are the features of C?
4. What is the structure of a C program?
5. What is the purpose of the main() function?
6. What are header files?
7. Why do we use #include?
8. What are variables?
9. What are data types in C?
10. Difference between int, float, double, and char?
11. What are constants?
12. What are identifiers?
13. What are keywords in C?
14. What is the use of the sizeof() operator?
15. What are arithmetic operators?
16. Difference between = and ==?
17. What are relational operators?
18. What are logical operators?
19. What is the modulus operator (%)?
20. What is type casting?
21. What is implicit type conversion?
22. What is explicit type conversion?
23. What are comments in C?
24. What are escape sequences?
25. What is operator precedence?

Medium (26–50)

26. Difference between for, while, and do-while loops.
27. What is a nested loop?

28. Difference between break and continue.
29. What is a function?
30. What are function prototypes?
31. Difference between actual and formal parameters.
32. What is recursion?
33. What are arrays?
34. Difference between 1D and 2D arrays.
35. What is a string in C?
36. What is the null character (\0)?
37. How are strings stored in memory?
38. Difference between gets() and fgets().
39. What is a pointer?
40. Why are pointers used?
41. What is a NULL pointer?
42. Difference between *p and p.
43. What is pointer arithmetic?
44. Difference between call by value and call by reference.
45. What are local variables?
46. What are global variables?
47. What are storage classes?
48. What is the static keyword?
49. What is the extern keyword?
50. What are command-line arguments (argc and argv)?
