

React JS Interview Questions

React Basics

1. What is React?
 2. What are the features of React?
 3. What is JSX?
 4. Why do we use JSX?
 5. Difference between HTML and JSX?
 6. What is Virtual DOM?
 7. How does React update the UI?
 8. What is reconciliation?
 9. What is SPA (Single Page Application)?
 10. Advantages and disadvantages of React?
-

Components

11. What is a component in React?
 12. Difference between functional and class components?
 13. What are pure components?
 14. What are reusable components?
 15. What is component composition?
 16. What are higher-order components (HOC)?
 17. What are controlled and uncontrolled components?
 18. What is lifting state up?
 19. What is prop drilling?
 20. How can prop drilling be avoided?
-

Props and State

21. What are props?
22. What is state?
23. Difference between props and state?
24. Why is state immutable?

- 25. How does setState work?
 - 26. What causes re-rendering in React?
 - 27. Difference between local state and global state?
-

Hooks

- 28. What are hooks?
 - 29. What is useState?
 - 30. What is useEffect?
 - 31. What is useRef?
 - 32. What is useMemo?
 - 33. What is useCallback?
 - 34. What is custom hook?
 - 35. Difference between useMemo and useCallback?
 - 36. Difference between useEffect and useLayoutEffect?
 - 37. What is dependency array in useEffect?
 - 38. When does useEffect run?
 - 39. How to prevent infinite loops in useEffect?
 - 40. What is cleanup function in useEffect?
-

Event Handling and Forms

- 41. How are events handled in React?
 - 42. What are synthetic events?
 - 43. Difference between onClick and addEventListener?
 - 44. How do forms work in React?
 - 45. How do you validate forms?
 - 46. What is two-way data binding?
 - 47. How do you handle multiple input fields?
-

Lists and Rendering

- 48. Why are keys important in React?

49. What happens if keys are not unique?

50. What is conditional rendering?
