

C Advanced Interview Questions

1. What are tokens in C?
2. What are identifiers?
3. What are escape sequences?
4. What is the use of \n and \t?
5. What are comments in C?
6. Difference between single-line and multi-line comments?
7. What is an expression?
8. What is operator precedence?
9. What is associativity?
10. What is the ternary operator?
11. Difference between pre-increment and post-increment?
12. What is implicit type conversion?
13. What is explicit type conversion?
14. What are bitwise operators?
15. What is modulus (%) operator?
16. What is the purpose of return statement?
17. What is the use of const keyword?
18. What is the difference between character and string?
19. What is ASCII?
20. What is the range of char, int, and float?

Medium (21–40)

21. What is a multidimensional array?
22. How are strings stored in memory?
23. What is string termination character?
24. Difference between strcpy() and strncpy()?
25. Difference between strcmp() and strncmp()?
26. What is an array of pointers?
27. What is a pointer to pointer?

28. Explain pointer to array.
 29. Difference between array and pointer?
 30. What are command-line arguments?
 31. Explain argc and argv.
 32. What is static variable?
 33. What is extern variable?
 34. What is register storage class?
 35. What is auto storage class?
 36. What are macros?
 37. Difference between macro and function?
 38. What is file handling in C?
 39. What are file modes in C?
 40. Difference between text file and binary file?
-

Hard (41–50)

41. What is a self-referential structure?
 42. What is a typedef in C?
 43. What are enumerations (enum)?
 44. What is the difference between `#include <file.h>` and `#include "file.h"`?
 45. What is conditional compilation?
 46. Explain preprocessing directives.
 47. What is segmentation fault?
 48. What are command-line macros?
 49. What is the difference between stack memory and heap memory?
 50. Explain the memory layout of a C program (Code, Data, BSS, Heap, Stack).
-
